In the above we cite two of the most prosperous cities in Texas and compare them with two of the most prosperous counties in which are no large cities. It is a fair comparison between the cities and the country and the result shows that the great boom which has caused Texas to jump from \$419,000,000 worth of taxable property in 1882 to over \$500,000,000 in 1883, results principally from the development of the latent resources of the magnificent agricultural and pastoral domain of the Lone Star State. The Texas cities are all growing, but they are scarcely keeping up with the country.—Louisville Banner.

The quartette singing was likewise pleasing, and, taken altogether, the entertainment was very satisfactory.

SWEET GUM AND MULLEIN.

Most of our readers have thought very little of the fact that in the exudation they see clinging to the sweet gum tree in the hot summer months there is a principle that is considered the most powerful stimulating expectorant known. They have no doubt thought less of the fact that in the mullien plant seen in the old fields is a muclinginous substance that acts as a southing demulcent on the inflamed surface of the lungs, and which has attracted the attention of the medical world in consequence of its wonderful effects on consumption. When these things are considered it is not surprising that "Taylor's Cherokee Remedy of Sweet Gum and Mullein," the great panacea for Coughs, Croup, Whooping Cough and all Bronchial Affections, is proving such a boon to those suffering.
